RE: ML 49448-MP Default in Permit Agreement

Dear Mr. Bown:

The above numbered Mineral Materials Permit was issued to Bown Building Stone Company in 2004 for a term of five years to extract building stone from certain trust-land mineral estate in Sanpete County, Utah. It has come to the attention of the Trust Lands Administration that Bown Building Stone has failed to maintain an active registration with the Utah Division of Corporations. According to the records of the Division of Corporations, the registration for Bown Building Stone is delinquent as of August 23, 2005. An applicant or permittee must be qualified to do business in the State of Utah in order to hold or maintain an active mineral lease or minerals permit upon state trust lands (Rule R850-3-200).

Bown Building Stone is in default of the Rules of the Trust Lands Administration and the terms and conditions of mineral Materials Permit No. ML 49448. As provided in paragraph 18 of the permit, Permittee has 30 days from date of this letter to make legal remedy. Failure of the Permittee to re-establish itself as a legal entity qualified to do business in Utah within 30 days from the date of this notice shall work a forfeiture of the permit.

You will please immediately cease all operations upon the permitted lands until this matter is resolved. Please consult with your attorney if you have any questions in this matter.

Sincerely,

John T. Blake
Trust Land Mineral Specialist
